

Capabilities Statement

COMPANY OVERVIEW

Aery provides design, engineering, systems integration, modifications, certification, maintenance and flight operations solutions that support critical aviation mission requirements for domestic and foreign governments and select corporations and individuals in the private sector.

ABOUT OUR TEAM

Aery is led by Steve Walton, who has decades of experience as an FAA Designated Engineering Representative (DER). Together, the Aery Team has developed over 100 Supplemental Type Certificates (STCs) with over 200 projects, and more than 500 airworthiness releases.

BUSINESS SERVICE OFFERINGS

Certification

FAA Designated Engineering Representatives (DER); FAA Designated Airworthiness Representatives (DAR); FAA/EASA Part 145 Certified Repair Station; STC-ODA (14 CFR Parts 23 & 25 (fixed wing); 14 CFR Parts 27 & 29 (rotorcraft); and EASA Level One Design Organization Certificate

Design

Turnkey, innovative, cost effective, flexible and certified

Engineering

Structural, electrical, mechanical, electromechanical, fabrication, assembly, test expertise, controlled processes, and flight test capabilities

Manufacturing

Single rapid prototype to full production

Modification

Major structural modifications, cockpit and avionics upgrades, interior and cabin electronics upgrades

Rapid Prototyping

Rapid prototype models, completed assemblies from initial design to prototype, limited production (military and commercial)

Supplemental Type Certificate Services

CORPORATE EXPERIENCE
